SUBJECT: Notice Posting - Mineral King

TO: Mrs. Richard Koch
6334 W. 80th Street
Los Angeles, California 90045

Dear Mrs. Koch:

The Disney Corporation has a permit to plan a recreational development at Mineral King. This proposed development is in line with the need for a balanced recreation program in the Sequoia National Forest and thus has the backing of the administrators of the National Forest as being in the general public interest. For this reason the Disney Corporation was given permission to distribute informational material to keep the public informed of the proposal.

Permission to place material on a public bulletin board may be granted if it serves the general public good. There were many people who considered the material you posted last year as not in the general public good. Since it is at least controversial and subject to question, no such permission will be granted this year.

Whether or not the Disney proposal is in the general public good will be decided in the courts, hopefully in the near future.

Sincerely,

M. R. JAMES
Forest Supervisor
